Summary

Electronics and Communication Engineering student with a keen passion for Embedded Systems, Web Development, and Artificial Intelligence. Exploring microcontroller programming, hardware-software interfacing, and IoT-based solutions. Eager to gain hands-on experience and grow skills in embedded development, AI integration, and full-stack project development.

Education

Year	Degree / Institution	Score
2023 – 2027	B.Tech in Electronics & Communication, Vellore Institute of Technology – Amaravati	CGPA: 9.32
2021 – 2023	Higher Secondary Education , Sri Deepthi Junior College	98.2%
– 2021	Secondary Education, Gopi Krishna High School	97.33%

Projects

EcoShield – Real-Time Environmental Monitoring System 2024

- Designed and developed a real-time monitoring system using Arduino sensors to collect and analyze air quality, temperature, and humidity data.
- Automated data processing with Embedded C, enabling efficient tracking of environmental changes and supporting sustainability initiatives.
- Tools Used: Embedded C, Arduino, Sensors, Data Processing & Automation

StockFlow – Inventory Management System 2025

- Built a full-stack inventory management dashboard using React, TypeScript, Vite, and Tailwind CSS.
- Implemented real-time sales analytics, low-stock alerts, and complete CRUD operations.
- Added role-based access control, responsive UI with light/dark themes, and CSV export.
- Technologies:** React, TypeScript, Tailwind CSS, React Query, React Router, Recharts

AI-Enabled Wearable Health Monitoring and Doctor Assistance System 2026

- Built a low-power STM32 L-series wearable integrating MAX30102 (HR & SpO₂), DS18B20 (Temperature), and MPU6050 (Motion/Fall).
- Applied multi-sensor data fusion and trend-based analysis for early detection of health abnormalities.
- Developed an edge-level decision engine for real-time risk classification without cloud dependency.
- Enabled emergency alerts via buzzer/SMS and IoT-based doctor monitoring.

Extra-Curricular Activities

Core Team Member, CSI Club & Chapter, VIT-AP University Sept 2023 – Present

- Organized coding initiatives, hackathons, and competitive programming contests.

Certifications

Embedded System Design Internship (Maven Silicon) – Certification in Digital Electronics and Embedded Systems

Technical Skills

- Programming:** Python, Core Java , C , Embedded C
- Development:** HTML , CSS , JavaScript , React **BackEnd:** Node.js **Version Control:** Git, GitHub
- Databases:** MySQL, OracleSQL, MongoDB
- Microcontrollers:** ARM7 LPC2148 (Basic), Arduino, STM32(Basic)
- Embedded Concepts:** GPIO, Timers, Interrupts, UART , ADC , SPI , I2C
- Tools:** Git , Github , LabView , Linux , keilµvision(Basic)

Relevant Courses

Embedded System Design, Microcontrollers, Microprocessors Digital Electronics
